

28 August 2013  
Washington Singer 219

10am coffee & welcome : starts 10:30am  
lunch 1pm : ends 3:30pm

Optimising Diffusive Transport Through a Synthetic Membrane Channel

Stefano Pagliara

Links between bacteria and human cells mediated by lipophilic molecules

Ulrich Keyser

From model membrane systems to biological function

Pietro Cicuta

A biodiversity theory of the lamB maltoporin, lambda phage infection and the greasy slide

Robert Beardmore

Cell membranes as morphoelastic probes

Peter Petrov

The journey of lambda phage DNA through two membranes

Ivana Gudej

# joint Exeter-Cavendish meeting :

## membrane biophysics & evolutionary systems biology
